

ABSTRACT OF THE DISCLOSURE

A method for communicating and controlling data, for example information data concerning intellectual property rights pertaining to a product, provides to arrange and organise a list of data defined by at least an alphanumeric code that identifies the existence of intellectual property rights for protecting a product, and to make available said list by publishing on an Internet site; to the cited product is associated an informative note that exactly refers to the existence of the mentioned intellectual property rights and contains the instructions for addressing to consult said Internet site.
